# QUICK FACTS

Established in  
**1991**

We operate from  
**8 global facilities**

Support available in  
**over 15 languages**

We have delivered more than  
**6,000 machines** to  
over 30 countries

We employ  
**QA and CI**  
departments

**62% of**  
our sales  
are repeat customers

We provide  
**project**  
management  
services

**Over 15%**  
of our staff  
work in engineering

We proudly create  
**manufacturing jobs**

Our entire group employs more than  
**250 dedicated people**

An equal opportunity employer

**We work  
extremely hard**

## DESIGN

We design for high performance,  
ease of use and serviceability.

## BUILD

We are proud to create  
manufacturing jobs in 4 countries.

## INTEGRATE

We offer turnkey solutions with  
complete system responsibility.

## SUPPORT

Our suite of service tools  
are second to none.

NEAR YOU

# RELATIONSHIP DRIVEN

We're different, we always have been. We continuously strive to offer our valued customers MORE.

Investing in packaging automation is not only about the machine itself but rather the people you are working with, the company behind it, its infrastructure, longevity and support.

Each visit is tailored to your personal needs, our factory trained representatives are available to discuss specific applications, offer training and provide necessary expertise.

Meet us in person, see our solutions first hand and make the most informed decision for your business.

## IDEAL ENVIRONMENT

See our solutions, test your packaging and products.

## LEARNING EXPERIENCE

Let us show you the ins and outs of our solutions and provide our recommendations.

## PERSONALIZED TESTING

It's all about you and your specific needs when you visit an Xperience Center.

## CONVENIENCE

All of our locations are conveniently located near major international airports.

# HOW WE WORK

# SOLUTION DRIVEN CUSTOMER FOCUSED

# CUSTOMER SERVICE

## COMMISSIONING

Our service department is run by factory trained technicians devoted to working closely with your production team in order to ensure the most positive servicing experience.

Prior to running your new machine, we will educate your team in order to fully understand the functionality, problem solving techniques and key machine inner workings.

Our professional service staff will guide your team through the fundamentals and ensure that operators are successful in operating your newly purchased packaging solution.

## PROCESS

- 1 Review system and explain agenda
- 2 Inspect and power up machines
- 3 Equipment adjustment and alignment
- 4 Equipment training
- 5 Change-over training
- 6 Maintenance training
- 7 Production operation
- 8 Final review

# LASTING RELATIONSHIPS

We are committed to excellence and dedicated to exceeding your expectations. By providing personal after-sale service and training, we seek to build and nurture long-standing relationships.

*Supplied as fully-integrated, turnkey line solutions, the EndFlex Packaging machines have proved to be "highly reliable pieces of equipment that immediately adjust themselves to the specific product counts and quantities that we are processing at any one time," notes Tarnowsky. "We are very happy with the EndFlex equipment's performance."*

**Emil Tarnowsky**  
Vice-president of operations,  
Jempak

*"After the machine arrived in January, WeighPack sent in a technician, at their cost, who spent a full week here taking us through the installation and startup, and he did not leave until it was totally synchronized with our process. I really have to give WeighPack big kudos for their excellent service and attention to detail."*

**Luis Javier Rendon**  
Vice-president of operations,  
Redlands Foods / Trophy Nut

## SYSTEM START-UP

Our skilled service technicians will inspect and ensure correct assembly while also checking for proper electrical and air supply. Once powered on, our technicians will spend time in equipment start-up and make any adjustments as a result of shipping.

## OPERATIONAL TRAINING

Operational training gives users key technical insights and product knowledge. Our service technicians will touch on the principles of design and customization to expedite the learning curve, helping operators to anticipate and troubleshoot issues.

## PREVENTATIVE MAINTENANCE

Our field service technician will review all necessary requirements of equipment maintenance as well as proper sanitation in order to maintain equipment and component longevity.

*The Aurora plant's production manager Sonya Formanek, who joined the company at the same time that Smith took it over, says she is very pleased with the machine's performance, singling out its user-friendly operation, hygienic open-access design for quick cleaning and maintenance, quick changeover capabilities and, to date, virtually flawless performance. "I have been very impressed with the Sleek 50 Wrapper machine so far," Formanek states, saying the new flow wrapper currently produces about 54 single-serve packs per minute on average.*

**Sonya Formanek**  
Production Manager,  
Cookie It Up!

*"As I went to trade shows and conducted other forms of research, I was looking for simple, solid, reliable equipment that wouldn't be excessively expensive. The simplicity factor was especially important because we're located in a pretty remote part of the country, where you don't want things going wrong if you can avoid it. Eventually I came to the conclusion that the Paxiom system was what I was looking for, and the fact that it all came from one source made it all the more appealing."*

**Mike Abeyt**  
Product Development,  
Ute Mountain Tribe Farm & Ranch

# CREATING MANUFACTURING JOBS FOR OVER 25 YEARS

## OUR DIVERSE RANGE

Because packages come in all shapes and sizes, we build our machinery to match.

Palletizing

# WEIGHING & DISPENSING

## PRIMO COMBI

Engineered for high speed applications and tight accuracy requirements, the PrimoCombi® is the most advanced weigh filler on the market today both in mechanics and software design.

Security Setting

Import / Export Data

Embedded Training Videos

Production Reporting

## PRIMO LINEAR

Automatically weigh and fill a wide range of products with our vibratory and conveyorized net weighing machines.

## STAR AUGER

Designed for powders, chemicals, granules, coffee and dusty products, the servo-driven Star Auger™ offers high speed and precision.

## DEPOSITOR

Eliminate hand labor by automatically filling multiple product fill zones. The Depositor™ is often integrated with automatic thermoforming machinery and tray indexing conveyors.

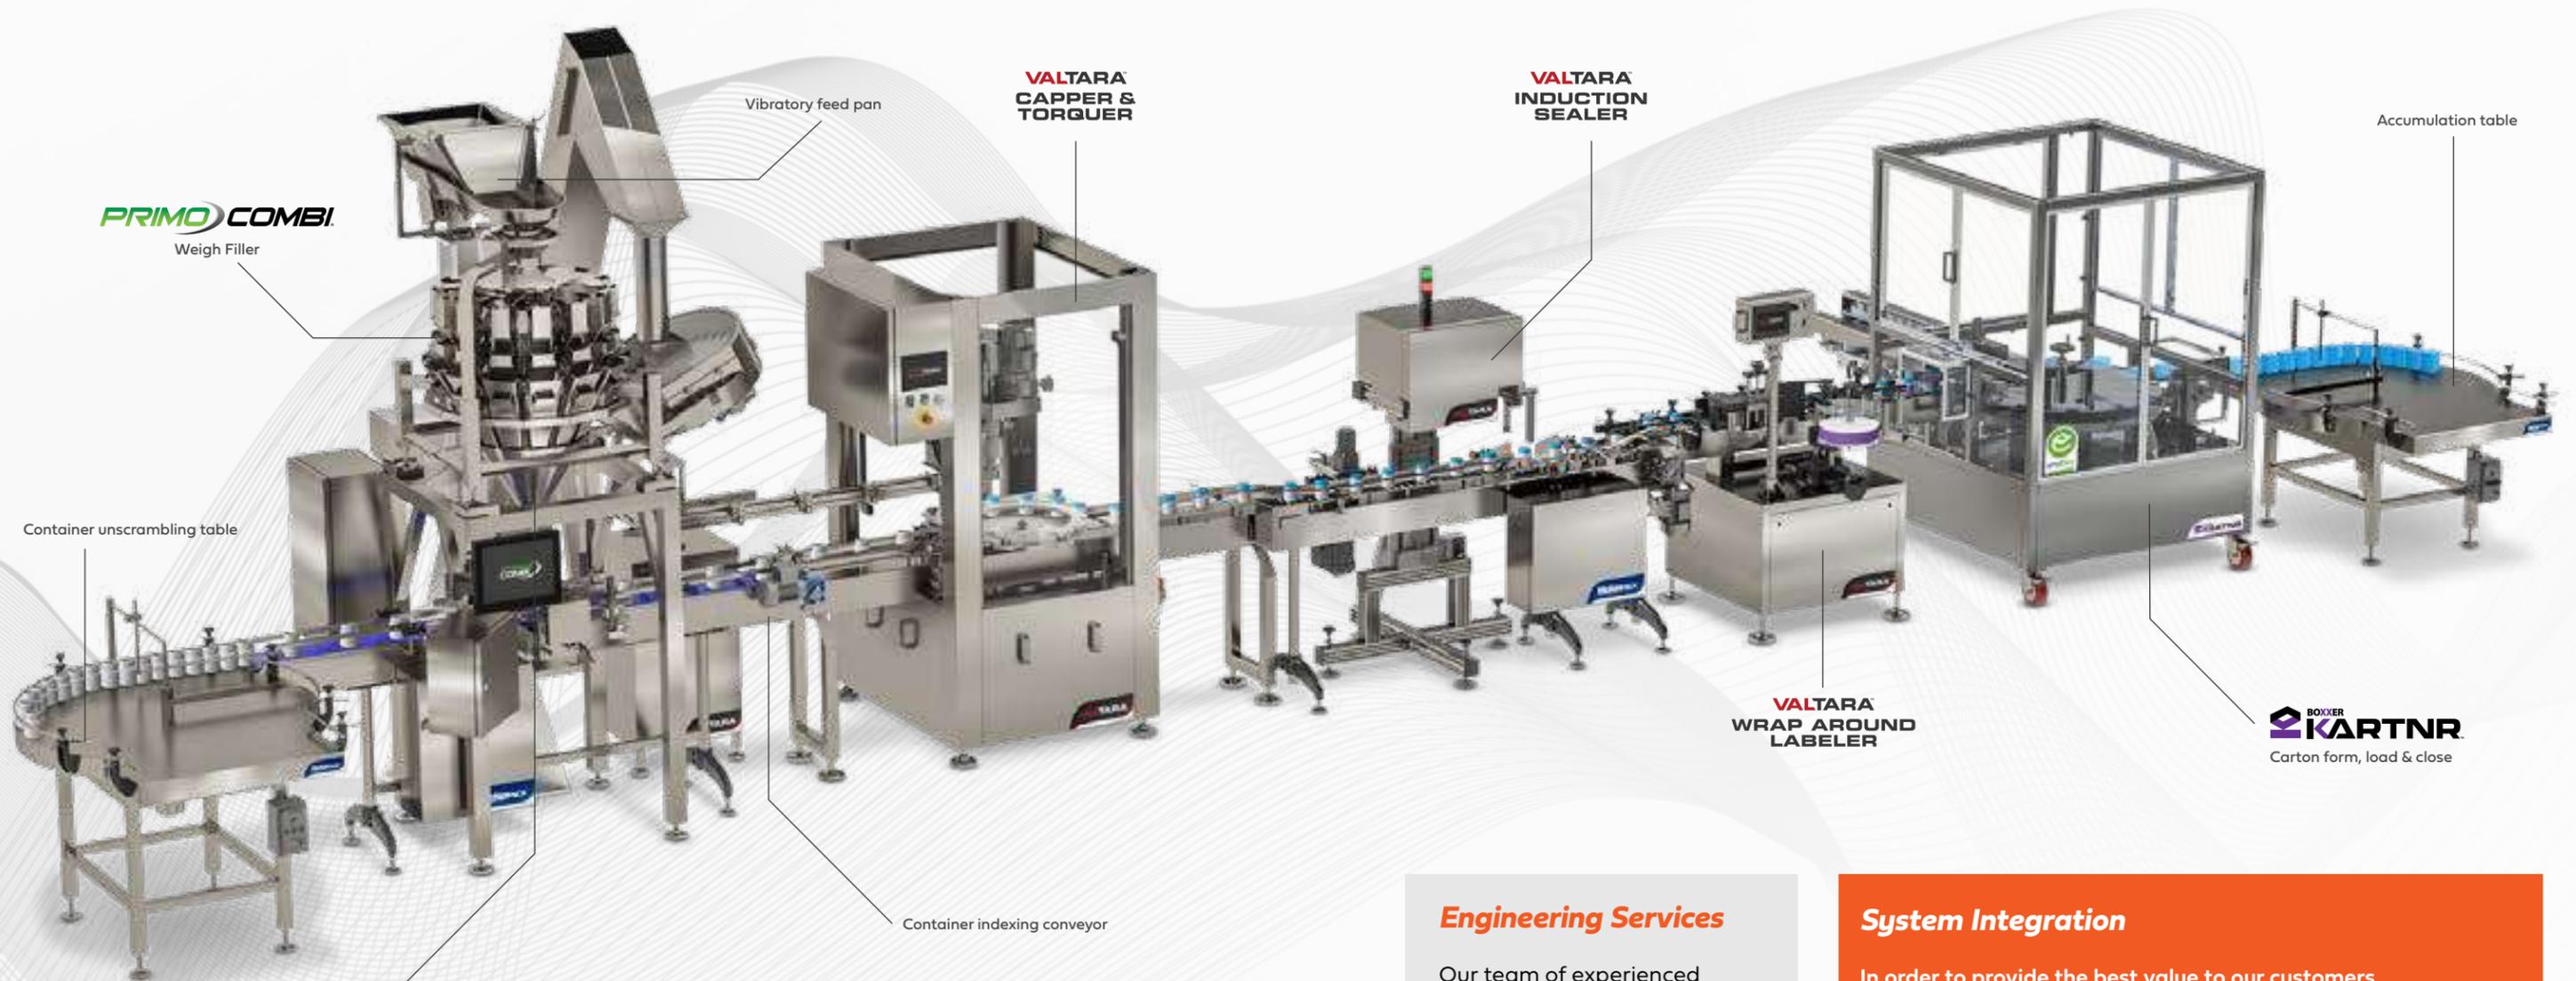

## VALTARA LIQUID FILLER

Convey, fill and cap with our integrated liquid filling systems. Our liquid filling solutions are designed for a wide range of container formats and sizes including standard caps, eye droppers, tinctures and more.

# CONTAINER FILLING & HANDLING

**PRE-CheQ**  
ANALYZER

### Our cutting-edge PRE-CheQ™ offers:

- Secondary weight measure with 1/100 gram resolution
- Programmable min/max weight allowance
- Re-accumulation of product outside of desired weight range
- Real time production reporting with data export
- Operator security parameters

### Engineering Services

Our team of experienced mechanical and automation engineers are available for all your system needs.

From basic layout design to integrating third party equipment to custom plant layouts, we do it all!

### System Integration

In order to provide the best value to our customers, we offer System Integration services that include:

- Assembling all equipment as a system in our facility
- Connecting all interface cables
- Mounting all electrical enclosures and control panels to support structures
- Real time system testing of the entire integrated system with your packaging materials (not just the individual machine)

# FORM, FILL & SEAL BAGGING

## R2B FORM & SEAL™

The R2B™ can create a wide variety of bags from roll stock including shaped, pillow, standup, 3 side & 4 sided seal pouches with zipper closures.

This servo-driven horizontal bagger offers the highest performance and significantly reduces material cost.

## XPDIUS® i130

Engineered for high performance requirements, the XPdius® Elite family of vertical baggers are engineered for high speeds

## VERTEK® 800/1200

The VerTek® series of vertical form, fill & seal machines are easy to use and compact.

## VERTEK® 2400

For meeting the largest bagging requirements the heavy duty VerTek® 2400 vertical form, fill and seal machine can produce pouches up to 24 inches (600 mm) wide.

# PRE-MADE POUCH FILLING

## SWIFTY BAGGER®

Automatically open, fill and seal pre-made pouches. High performance pouch filling with models available from 1,200 to 4,800 pouches per hour.

High speed models available upon request.

## SWIFTY BAGGER® MINI

For filling pouches as small as 3.5 inches wide and 5 inches long (90-130 mm).

Affordable and compact, the Mini can fill up to 900 pouches an hour.

## SWIFTY BAGGER® JUNIOR

This versatile pouch filling machine can be integrated with any auxiliary filling machine including multihead weighing, net weighing and auger filling.

For production rates up to 700 bags per hour.

## Bingo bagger®

Designed for wholesale and internal packaging applications, the Bingo Bagger® offers MAP (modified atmosphere) and VAC (vacuum) features.

## ZIPPY BAGGER®

For filling polyethylene wicketed bags up to 35 packages per minute.

## VS Bagger™

This very simple bagging machine automatically opens, fills and transfers wicketed pouches.

# WRAPPING

## BREEZY

Package products from 3 to 36 inches (75 to 900 mm) long without adjustment or waste.

## SLEEK40

Affordable, compact and produces up to 60 packages per minute.

## SLEEK45

High speed production up to 450mm film web width.

## SLEEK65

Produce large packages up to 650 mm web width.

## SLEEK INVERTED

The versatile Sleek Inverted is ideal for soft or sticky products, multi-packs, components, hardware and widgets.

# CORRUGATE FORMING

Use the PopLok® to fold and form die cut trays for a wide variety of products including displays and shippers for apparel, auto-parts, electronics, food delivery kits and much more.

The PopLok® eliminates expensive hand labor while increasing productivity.

Designed for producing glued trays. The Vassoyo™ can also form trays with lids for retail.

Engineered for case erecting for both taping or glue applications, the Boxxer™ case erector family is compact, flexible and provides quick change-over.

# CARTON FORMING

The Boxxer Kartnr™ automatic carton forming machine is engineered to vertically form chip board cartons, insert containers, and close cartons.

The compact Boxxer Kartnr™ includes a heavy duty steel frame, PLC, color touch screen, interlocked safety doors and easy to adjust product change over.

**Available in three models:**

- Pop-Up Auto-Lock Carton
- Tucked Carton
- Glued Carton

**Form - Insert - Close**

# END OF LINE AUTOMATION

## Pick & Place

Automatically top-load with a multi-axis robot. This technology is often used for precision placement and higher speed applications.

## Bottom Load

Automatically stage, lift and bottom load a wide variety of pack patterns. Ideal for cartons, containers and delicate products.

## Side Push

Commonly used for loading containers into ship-ready cases, the side pusher uses servo drives to stack and push product into cases or trays.

## Drop Pack

Drop packing uses gravity to automatically load bags or containers into cases.

# END OF LINE AUTOMATION

## BOXXPAK™ PACKING SYSTEM

The BoxxPak™ will erect a case, index to each operator's station and includes a horizontal feed conveyor that makes picking and loading easier than ever.

### Engineering Services

Our team of experienced mechanical and automation engineers are available for all your system needs.

From basic layout design to integrating third party equipment to custom plant layouts, we do it all!

### System Integration

In order to provide the best value to our customers, we offer System Integration services that include:

- Assembling all equipment as a system in our facility
- Connecting all interface cables
- Mounting all electrical enclosures and control panels to support structures
- Real time system testing of the entire integrated system with your packaging materials (not just the individual machine)

## POUCH COUNTING & FILLING SYSTEM

Optically count flexible or solid packages and loose fill into erected cases or trays.
